2023 Annual Conference**

**Evanston Wyoming
Conference Agenda**

RWI is able to mitigate environmental contamination by controlling the dry aerosol drift commonly associated with higher horsepower evaporators. We designed our evaporators with critical velocity control to prevent the formation of daughter particles. By preventing the formation of daughter particles, we are not releasing pollutants into the air. This allows the water droplet to be specifically sized to not dry out in flight or lose control of contaminants. After the ion contamination is concentrated the droplet returns to the pond keeping the pollution within the impoundment area.

The Wyoming Solid Waste & Recycling Association welcomes you to the 2023 Annual Conference.

Wyoming Solid Waste & Recycling Association

The WSWRA 2023 Annual Conference in Evanston Wyoming!

Welcome to Evanston Wyoming! Time to kick back with your colleagues and enjoy a few days of learning, team building, and networking. You have earned it!

The Solid Waste and Recycling industry is a busy and ever-evolving industry. Each year, we are faced with new challenges, new innovations, and new people working in our groups. The constant change in our industry leads to new challenges and opportunities. It is very important to meet each year to keep in touch with everything that has changed in our industry.

The WSWRA Team is committed to providing a solid and informative conference each and every year. Enjoy what Evanston has to offer and get ready for a great conference!

“

Nothing you do as employers in the solid waste industry is as important as making sure your workers go home to their loved ones at the end of each day. That requires constant attention to the many safety hazards they face in solid waste collection, processing, and disposal.

”

David Biderman WSWRA 2023 Keynote Speaker

Explore Evanston Roundhouse & Railyards:

The **Union Pacific Railroad Complex** in Evanston, Wyoming, was built to serve the Union Pacific Railroad main line running through Evanston. The complex's brick buildings were built in 1912–13, with frame buildings spanning the period from 1871 to the 1920s. The complex features a roundhouse with 27 stalls built during the 1912 improvement phase, replacing an earlier roundhouse built in 1871. The complex was the chief service point on the UP main line between Ogden, Utah, and Green River, Wyoming.

Five brick structures remain the roundhouse, machine shop, gas building, storehouse, and mineral building. Five frame buildings include an office, a woodworking shop, and a company store.

The maintenance depot was closed and transferred to Green River in 1927. The Evanston complex became the Union Pacific Reclamation Plant, where rolling stock received a heavy overhaul. It was the largest employer in Evanston, employing more than 300. The Union Pacific deeded the complex to Evanston in 1974. An overhaul facility for railcars reopened the same year. Starting as the Wyoming Railcar Company, the operation was absorbed by the Lithcote Company, which was in turn acquired by the Union Tank Car Company. The Union Tank Car Company moved out of the complex in 1998. The roundhouse complex is being restored by the Evanston Renewal Agency.

The Union Pacific Railroad Complex was listed on the National Register of Historic Places in 1985.

At 105 years of age, little Switch Engine 4420, along with her tender, which held the coal and water, has returned to her home at the Evanston Railyards and Roundhouse.

In 1915, during WWI and the presidency of Woodrow Wilson, 4420 was brought by the Union Pacific Railroad to Evanston — a small, 47-year-old community of 3,000 residents.

Over the next 43 years, the engine was worked at the railyards, bringing loaded cars to the Roundhouse to be pulled by larger engines to many destinations, and the town grew to be a major railroad community.

Welcome to Evanston! Seven Evanston Facts:

01

Population 11,747 as of 2021

02

The Bear River flows through the town, and is a starting point for camping, hunting, and other outdoor opportunities.

03

The railroad arrived in the area in November 1868.

04

Evanston Roundhouse was built 1912-1914 by Union Pacific Railroad. In 2009 the City refurbished the first four sections of the building and is in use today as a public event center.

05

Elevation 6749' above sea level.

06

Located in Uinta County, Wyoming, with a population of 20,450 people..

07

Evanston is proud to host the WSWRA 2023 Annual Conference! Welcome to Evanston Wyoming!

Jerry Hamel
President WSWRA
2022-2023

Welcome to Evanston Wyoming!

Welcome to Evanston, Wyoming, the site of the 2023 WSWRA Conference! I would like to extend my gratitude to everyone for taking time out of their busy schedules to travel to the southwest corner of the great state of Wyoming. The 2023 WSWRA conference looks to be one many will remember as we welcome David Biderman to be our guest to kickoff of the conference.

In the current high inflationary environment, the Board has worked hard to keep the conference affordable for all. This would not be possible without the support of our sponsors. We would like to thank all of them for the time and investment to make the WSWRA the event that we annually look forward to. I would like to extend a great deal of gratitude to Ron Taylor. Ron has toiled selflessly to ensure that the 2023 WSWRA conference would be a success. Many of the venues would not be possible without the time and effort Ron has put into ensuring a unique experience for the Membership. The Board has been active throughout the year in exploring possible grants, legislative bills, and potential partnerships with companies that could benefit the Membership. Finally, and most importantly, Beau Peck has been the backbone of the conference. Be sure to thank Beau for elevating the conference to the high level of quality and professionalism we have come to know.

Each year we have several board positions to be filled. I can speak from personal experience that the small investment of time on the Board has paid great dividends with networking and a greater understanding of the challenges that our Members face. We are looking for hardworking professionals that have the support of their employer to make a three-year commitment to WSWRA. The positions up for election this year, and the respective incumbents, include:

- City / County (Ron Taylor)
- Member-at-Large (Jerry Hamel)
- Diversion / Recycling (Michael McAllester)

If you may be interested in joining the Board, please reach out to a Board member and express your interest in running.

Evanston has graciously welcomed the WSWRA Membership for the 2023 conference. Be sure to visit the local businesses and attractions to enhance your conference experience.

Thank you! - Jerry Hamel

Meet your 2023 WSWRA Board Members & Staff:

Jerry Hamel:

McAllister:**

WSWRA Board
Member, Baggs
Wyoming Solid
Waste Disposal
Dist.

Interested in becoming a WSWRA Board Member? Commitment is a three-year term, and you can help with the growth of Wyoming's Solid Waste & Recycling future! The board meets remotely as needed (about once per month), and in person once prior to the conference for conference planning. The board's main roles are planning the Annual Conference and promoting waste diversion. Participation is required for the entire week of the conference.

Contact a board member to place your name on the ballot for election during the Annual Membership Meeting on Wednesday afternoon.

In-Vested in Safety for the 2023 Conference

WSWRA 2023 Conference is focused on industry safety for Solid Waste and Recycling Workers.

For this year's conference to help promote safety, all participants will receive a Professionally Printed WSWRA Surveyors Grade Safety Vest. Why? Lack of

visibility is often a leading cause of injury or death for Solid Waste Workers. Many programs in the region do not have a PPE Program that requires Hi Visibility clothing. WSWRA is aiming to change Wyoming's safety culture to include High Visibility Vests as Standard PPE. Each year, participants will receive a new safety vest. Our goal is for attendees to return to the conference each year to change out their old vests for new ones. Much like the beloved WSWRA ballcap, we hope that attendees use this resource in their

daily lives. We hope that attendees help promote vests by bringing back additional ones for their crews.

According to the Federal Bureau of Labor Statistics, the solid waste industry has moved from the fifth most dangerous occupation to the seventh (2022). With WSWRA's focus on Safety, we are asking all to revisit their safety programs and add additional steps to keep their workers safe.

Photo: Gillette News Record, 2015.

2023 Event Sponsors

Without the contributions of our generous event sponsors, The Wyoming & Solid Waste Association's Annual Conference would be double the cost to our membership. Thanks to the generosity of all of our sponsors, we are able to help keep pricing for attending the conference as low as possible for our membership. In addition, our sponsor's contributions make the event fun and entertaining. It is expensive to put on our conference each year, without our great sponsors we would be very limited in the activities and content that we bring each year. We invite you to network with all of our great sponsors. Each and every one of them provide essential services to the Solid Waste and Recycling Industry. Take a moment to thank our sponsors for their contribution to this conference. Connect with them to make sure you are utilizing all of the tools that are needed to perform your job as efficiently as possible.

Who is Ready for a Dutch Oven Dinner & Horseshoes?

The Evening Dinner and Horseshoe event at the Annual Conference is one of the highlights of the conference. This event is held Tuesday Evening at the City of Evanston Hamblin Park.

Enjoy a great meal provided by Big Dave's Dutch Oven. Big Dave is an Evanston legend that often prepares meals for large events and the Wyoming Governor. This is outdoor cooking at its best!

Following the great food, stick around for the annual horseshoe tournament. This event is free and there will be sign-ups at the event.. Teams will be selected at the event. Winners receive a jacket and the claim to fame of being a WSWRA Horseshoe Champion!

Beer and Beverages are provided at the event!

Tuesday Night Entertainment

After a great Dutch Oven meal, relax at the park with colleagues and listen to great music.

Local Country group, **The Fall River Boys** will be performing at Hamblin Park, during dinner and the horseshoe tournament.

The Fall River Boys includes Mark E Seeley & Scott Glen Lambertsen from South East Idaho.

10:20 am - Noon		Technical Presentations (Concurrent Sessions #1 and #2)	
 Landfill / Transfer Station Track		#1 Landfill / Transfer Station Track City of Evanston Roundhouse & Railyards Portland Rose Room	
		10:20 am	Identifying Savings and Efficiencies within your Solid Waste Program. Andrew Frey, P.E., Trihydro Solid waste programs are complex operations that combine waste handling with heavy equipment, operators, management, elected officials, and the public. These programs operate to the best of their abilities, but sometimes savings and efficiencies are missed due to short-term goals, understaffing, incorrect equipment, or inadequate training. Simply put, you don't know what you don't know. During this presentation, we will explore some operational evaluations that can be applied by every program manager and operator.
		11:10 am	Dealing with Difficult Waste Streams – Roundtable Discussion Led by Craig McOmie: WDEQ <ul style="list-style-type: none">• Lithium-ion batteries and Transfer Station/Landfill fires

Special Thanks!

There are so many people that have taken the time to help with this conference. Here are a few to give extra thanks! Roll the Credits!

Uinta County Landfill Members led by Ron Taylor, for event planning and tours around the City. Your help in planning this event was exceptional and a fun experience. **City of Evanston Roundhouse & Railyards**, for providing event services for the event. What an amazing historical building and facility! **Big Dave's Dutch Oven & Crew** and the **Fairway Restaurant & Bar** for Food and Beverages for the Event. Your services are amazing. **The Fall River Boys** for providing us with great entertainment! **The WDEQ Team** for hosting the Landfill operator testing, and for **Jody Weikart** for always providing us monthly updates for our Used News Newsletter. I really enjoy our talks each month bringing new ideas and events to the table. **Evanston Chamber of Commerce** for lots of help with pre planning this event! The many people that help edit this conference booklet for content and grammar proofreading, your second set of eyes is very much appreciated!

The Numerous **Speakers** that take time to bring premium content for our conference. Without you, we would have nothing to talk trash about! The dozens of **Vendors and Sponsors** that support WSWRA by providing sponsorships that reduce costs for our membership and bring so much educational content to our show. Many travel great distances to attend to bring us the information we need! Sponsors are critical for the event. Without our awesome sponsors, the conference would cost more than double the rates we currently charge. Thank you for your continued support of WSWRA.

The WSWRA Board Members and Membership that take many hours of donated time each year to the conference. Thanks, **Jerry Hamel** for taking the reins as President this year! And to the members that attend each year. For many of us, the Annual WSWRA Conference is more than just an event, it is a large part of our family. To all in the Solid Waste and Recycling industry, Thank You for your support in WSWRA! We thank everyone that attended this year's conference! Your attendance is very much appreciated, and we are always excited to see everyone for our yearly gathering. Thank you for making it all possible. Thank you for being a part of Team WSWRA!

Front Cover: **Evanston Roundhouse, Evanston Chamber of Commerce.**

Thank you so much for making this conference a success! I thoroughly enjoy working with each and every one of you! Looking forward to next year.

Save the Date for **WSWRA's 2024 Annual Conference!**

**August 19th - 21st, 2024
Casper, Wyoming**

Located in **Casper Wyoming**

**This event will be one to remember! Be
sure to put this date into your calendar
today!**

Our science-based research and design was created to allow the water lofting system to minimize droplet collision. RWI's unique air foil design creates an air flow that minimizes energy consumption. We have the lowest energy consumption equipment on the market today, at less than 5 Horsepower. Our design sends the droplets on a well-formed trajectory path, which allows the droplets to shrink in flight rather than drying out completely. We offer both land based and pond based systems to enhance the sun's natural evaporation. Depending on your pond size, water quality and area we will help you determine the best solution to solve your problem.
